

MOTION BY SUPERVISOR MARK RIDLEY-THOMAS

JUNE 16, 2015

Assessor Modernization Project

An April 19, 2013 report back by the Chief Executive Officer and Chief Information Officer to a motion approved by the Los Angeles County Board of Supervisors on March 12, 2013, revealed that a staggering number of mission-critical systems within the County of Los Angeles (County) are obsolete. The Assessor's recommendations to implement a Modernization Project represent a significant step towards replacing a system that has long exceeded its useful life and upon which the County relies heavily. Once this and other County legacy systems are replaced with modern, cost- and energy-efficient systems, it is important that the obsolete systems be decommissioned appropriately.

I THEREFORE MOVE THAT THE BOARD OF SUPERVISORS:

Direct the Chief Information Officer (CIO) to work with the Assessor to update the Board of Supervisors on the status of decommissioning the old database systems beginning 120 days after the completion of Phase One of the Assessor Modernization Project and continuing every 120 days thereafter until the old database system is fully decommissioned.
